Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on whether the Company has in place an adequate internal financial controls system over financial reporting and the effectiveness of such controls. 2.1 Summary of significant accounting policies

(a) Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

(b) Tangible fixed assets

Fixed assets, are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

During the year 2010-11, the Company had revalued its land assets appearing in Fixed Asset note to recognise its fair market value as on 31st March, 2011. The revaluation is carried out based on valuation reports of independent valuers and the appreciation in the value of the assets is credited to Revaluation Reserve in the accounts.

(c) Depreciation on tangible fixed assets and Investment Property

Depreciation on fixed assets is calculated on a written down value basis on the basis of useful lives estimated by the management or those prescribed under the schedule II to the Companies Act, 2013. Depreciation in respect of additions to/deletions from the Fixed Assets, is provided on pro-rata basis with reference to the month of addition/deletion of the Assets.

(d) Borrowing costs

Borrowing cost includes interest, amortization of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

(e) Impairment of tangible assets

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

Notes to Financial Statements for the year ended 31st March, 2015

(f) Government grants and subsidies

Government grants of the nature of promoters' contribution are credited to capital reserve and treated as a part of the shareholders' funds.

Government grants / subsidies in the nature of promoters' contribution, given with reference to the total investment in an undertaking or by way of contribution towards its total capital outlay, are treated as capital reserve. Grants and subsidies from the government are recognized when there is reasonable assurance that the grant/subsidy will be received and all attaching conditions will be complied with.

(g) Investments

Presentation and Disclosure :

Investments, which are readily realizable and intended to be held for not more than one year from balance sheet date are classified as current investments. All other investments are classified as non-current investments.

Recognition and Measurement :

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are recognised as current investments. All other investments are recognised as long-term investments and carried at cost of acquisition. However, the carrying amount is reduced to recognise a decline, other than temporary, in the value of long-term investments by a charge to the statement of profit and loss. Current investments are stated at lower of cost and fair value determined on individual investment basis.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

Investment property

Investment in buildings, which is not intended to be occupied substantially for use by, or in the operations of, the Company, is classified as investment property. Investment properties are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any.

Depreciation on investments in property has been provided on written down value basis in accordance with Schedule II of the Companies Act, 2013 by estimating the useful life as 60 years.

(h) Inventories

Traded goods are valued at lower of cost and net realizable value. Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on a weighted average basis.

(i) Revenue recognition

Sale of goods

Revenue from sale of goods is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on delivery of the goods. The Company collects sales tax and value added tax (VAT) on behalf of the government and therefore, these are not economic benefits flowing to the company. Hence, they are excluded from revenue.

Interest

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Interest income is included under the head "other income" in the statement of profit and loss.

Dividends

Dividend income is recognized when the company's right to receive dividend is established by the reporting date.

Notes to Financial Statements

for the year ended 31st March, 2015

(j) Foreign currency translation

Transactions in foreign currency are recorded by applying the exchange rate at the date of the transaction. Monetary items denominated in foreign currency remaining unsettled at the end of the year, are translated at the closing rates, prevailing on the Balance Sheet date. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. Exchange differences arising as a result of the above are recognised as income or expense in the statement of profit and loss. Exchange difference arising on the settlement of monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognised as income or as expenses in the year in which they arise.

(k) Income Taxes

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.

(l) Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

(m) Provisions

A provision is recognised when the Company has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. Provisions are not discounted to its present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet and adjusted to reflect the current best estimates.

(n) Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

(o) Cash and cash equivalents

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank and in hand and short-term investments with an original maturity of three months or less.
